

ELABORATE RECEPTION IS PLANNED

By Peruvian Government
For Admiral Evans and
His Officers and Men

Lima, Feb. 16.—Great preparations are being concluded here and at Callao for the reception of the American battleship fleet, which is due to arrive at Callao probably on Wednesday unless Rear Admiral Evans forces the speed of the warships and makes up part of the time lost at Punta Arenas and before the fleet reached that port, in which event, it is possible the fleet may reach Callao on Tuesday, the date originally fixed for his arrival.

The government has issued orders that Rear Admiral Evans be paid the honors due a vice admiral, a courtesy which was extended to him at Rio de Janeiro and Punta Arenas. The program for the entertainment for the officers on the fleet includes a reception by Mr. Fanning, head of the firm of Grace and company; Mr. Channing, of the Cerro de Pasco Mining company, and Julius East. There will be also a number of boat races in the bay, in which it is expected that crews from the warships will take part.

On Friday Admiral Evans and the members of his staff will come to Lima and visit President Pardo. On Saturday President Pardo will give a grand banquet in the Exposition building in commemoration of Washington's birthday. The guests will include Admiral Evans and 250 officers of the fleet, the high government officials and a number of Peruvian military and naval officers.

On Monday a bull fight will be given, to which 5000 of the American sailors and 600 officers will be invited. On Tuesday there will be an excursion to Mount Meigs, the party traveling by special trains. Wednesday the American minister, Mr. Leslie Combs, will give a reception at the legation. On Thursday, General Pedro Muniz, minister of war and marine, will give a reception at the Exposition building, to which six hundred of the American officers will be invited. Friday night a ball will be given at the National club, the guests at which will include three hundred American officers.

On Saturday Admiral Evans will give a reception on board his flagship, the Connecticut, and invitations for this function will be in great demand. It is expected that some of the American warships will be thrown open for the inspection of the public. Everybody is on the quiver for the coming of the fleet.

Physician Named in Divorce Case.

The suit for divorce from his wife filed in common pleas court by William Fenton, of Louisville, is the sequel to the midnight escapade of a prominent physician of the village of Louisville some little time ago. In his petition Fenton accuses his wife of infidelity and names Dr. C. A. Walker of Louisville as co-respondent, stating that he had met Mrs. Fenton both in Louisville and at Zoar.

The scandal is said to have first become public when Fenton came home unexpectedly from a short trip a few nights ago and let himself in the house at about 1 o'clock in the morning. It is said he discovered that his place had been usurped by the physician in question. Just what took place when the alleged discovery was made has not become public yet but the filing of the suit for divorce quickly followed on the evidence of the wife's unfaithfulness.

Bristow Aspires to Senate Seat.

Salina, Kas., Feb. 16.—J. L. Bristow, ex-fourth assistant postmaster general tonight announced his candidacy for the United States senate to succeed Chester I. Long, whose term expires March 3, 1920. Mr. Bristow is editor of the Salina Journal.

STOPPED SHORT

Taking Tonics, and Built up on
Right Food.

The mistake is frequently made of trying to build up a worn-out nervous system on so-called tonics—drugs. New material from which to rebuild wasted nerve cells, is what should be supplied, and this can be obtained only from proper food.

"Two years ago I found myself on the verge of a complete nervous collapse, due to overwork, and study, and to illness in the family," writes a Wis. young mother.

"My friends became alarmed because I grew pale and thin and could not sleep nights. I took various tonics prescribed by physicians, but their effects were off shortly after I stopped taking them. My food did not seem to nourish me and I gained no flesh nor blood.

"Reading of Grape-Nuts, I determined to stop the tonics and see what a change of diet would do. I ate Grape-Nuts four times a day with cream and drank milk also, went to bed early after eating a dish of Grape-Nuts before retiring.

"In about two weeks I was sleeping soundly. In a short time gained 20 lbs. in weight and felt like a different woman. My little daughter whom I was obliged to keep out of school last spring on account of chronic catarrh, has changed from a thin, pale, nervous child to a rosy, healthy girl and has gone back to school this fall.

"Grape-Nuts and fresh air were the only agents used to accomplish the happy results." "There's a Reason." Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville" in pkgs.

SALEM NEWS

Salem, Feb. 16.—The congregations of most of the churches of this city joined in the union evangelistic services held Sunday evening at the Christian church on Ellsworth avenue, the opening of the Sunday school institute under the auspices of the Salem Federation of churches. The opening services were attended by large congregations from each church and the Christian church was crowded to the doors. The institute is in charge of Prof. M. A. Honline, of Columbus, of the State Sunday School association and the aim is to promote interest and efficiency in local Sunday school work. His opening address was exceedingly interesting and instructive. The union meetings will continue until Thursday evening.

Confirmation day was observed at the Episcopal church Sunday morning. Special exercises were conducted by the Rt. Rev. W. A. Leonard, of Cleveland, bishop of Ohio. The exercises were held at 10 o'clock, during the regular church hour, and were well attended.

One of the largest congregations present for some time greeted Rev. J. W. Reynolds Sunday morning when he made his initial appearance in the pulpit and assumed charge as pastor of the Christian church. Rev. Reynolds comes from Clinton, Ill., where he resigned as pastor of the Christian church to accept the call to the local pastorate, succeeding Rev. H. H. Clark who recently resigned. Rev. Reynolds preached an excellent sermon and made a most favorable impression on the congregation.

About 35 couples were guests of the boys of the High School Athletic association at a pleasant dance given by them Saturday evening in Calumet assembly hall. Several out of town guests were present and the affair proved to be a decided success.

Date for Convention Not Set. Senatorial Committee Agler said last night that he had been unable to see Senatorial Candidate Holles and for that reason could not announce the date for the senatorial convention. He said that Turner and Crawford were in favor of holding the convention in Canton on Tuesday, February 24, and that he and Committee-man Kamerer from Carroll county, favored the same date. It is believed that Holles will fall into line and that eventually this date will be decided on by the candidates and the committee-men.

Love of the Sea. It is most reasonable to assume that the maritime importance of such countries as Great Britain and the United States is due in a large measure to the intense interest evinced by the people of those countries in everything relating to nautical affairs. The sea has a special attraction for them, and that attraction manifests itself not only in their naval and mercantile fleets, but also in the passionate devotion with which they enter all forms of sport and pastime on the high seas.—Hindu, Madras.

Nations' Debts. The debts of the principal countries in Europe aggregate some \$5,000,000,000, involving an annual charge of more than \$240,000,000. France is at the head of the most indebted countries with \$1,167,000,000, and there come next Russia with \$920,000,000 of debt, Germany with \$840,000,000 Great Britain with \$789,000,000, Italy with \$520,000,000, Austria with \$400,000,000, Spain with \$360,000,000, and Hungary with \$240,000,000. —L'Eclair, Paris.

Wall Street Losses. Sturdy old Frank Work, of New York, long ago was asked by an inquisitive person if he had lost much. He growled out in reply, "No, of course not. I haven't lost a blessed cent," and he followed with a loud explanation, "but I've shrunk five millions of dollars." —Ambassador Reid in London.

The Blind. The blind are a peaceable people who do not cause themselves to be much talked about. That is no reason why we should forget them. The efforts of their teachers at the Hamburg congress to utilize the fruits of their common experience are infinitely praiseworthy.—Le Petit Parisien.

Fascination of London. London acts on the dweller in it as the sound of a bugle does on the warhorse. Having once heard it he longs to hear it again. It is usually when broken in hope and spirit that the Londoner desires to permanently flee from town.—London Opinion.

Gas vs. Electricity. A Dublin electric lamp company claims that electricity is the safest, the cheapest, and the most artistic of all illuminants. Unfortunately, the facts are against all three claims.—Gas World.

Property. The last thing we need to be anxious about is property. It always has friends or the means of making them. If riches have wings to fly away from their owners, they have wings also to escape danger.

Canadian Coins. At present all Canadian coins are minted in London, but after November they will be turned over at the Ottawa mint. The profit, which is now nearly half a million dollars, will accrue to the Dominion Government.

Many Tramps Killed. The Inter-State Commerce Commission reports that from 1901 to 1905, 23,944 trespassers were killed and 25,236 were injured on railroads. Of these from one-half to three-fourths were tramps.

A House Divided Against Itself

Civil War in the Stomach Spells Ruin.

Victory Belongs to You, if You Will. Costs Nothing to Try. The greatest foe to the progress of nations has been internal strife, civil war. Equally so is the greatest enemy of health in the human system civil war between the different parts of the body.

This is just what occurs in dyspepsia. War is declared between the stomach and the rest of the members of the body—illness results, inability to digest or assimilate food, heaviness, distention to work, and in a word, all the attendant evils of imperfect digestion. What you need is an ally. An ally who will not only help but will absolutely insure you the victory. That ally is Stuart's Dyspepsia Tablets fight your battles for you, and by doing the work of your stomach, give it a complete rest, and allow it to re-enter the lists reinforced, refreshed, and rejuvenated.

A single one of these marvelous tablets will digest 3,000 grains of food. Leading physicians all over the world have endorsed Stuart's Dyspepsia Tablets, and have certified them free from harmful drugs.

Simple to take. Harmless, efficacious. No doctor's bills. Only 50c.

At all druggists or write to us direct. Free sample sent on application. F. A. Stuart Co., 150 Stuart Building, Marshall, Mich.

DISAPPEARING TULE LAKE.

The Water is Rapidly Falling and a Tremendous Whirlpool Has Formed.

The water of Tule Lake is rapidly falling, and a tremendous whirlpool has formed just off Scorpion Point, through which the water is passing with a deafening roar that can be heard a great distance. Below is apparently a great channel underground through which the waters find outlet beneath the Modoc lava beds and thence through the drainage of Fall River to Pitt, and finally on to the ocean through the Sacramento and San Francisco Bay.

It has long been held by geologists that Tule Lake has an underground outlet and that Fall River which bursts from a gushing spring in Modoc county, Cal., is the vent. Last spring the lake water reached a higher level than has ever been known since the country was settled, and bordering farms were inundated. For several days the water has been receding, and investigation revealed the new outlet. Should the vent entirely drain the body of the lake it will add 50,000 acres of irrigable land to the project and at a saving of hundreds of thousands of dollars to the people of the Klamath Basin, as the intended diversion of Lost River will be rendered unnecessary.

CITY OF MAPLES.

It is Macou, Mo., and the Stranger Invariably Notices the Trees.

The stranger in Macou, Mo., invariably notes the large number of magnificent shade trees that border the streets of the town. The place has come to be known as "The City of Maples," and the inhabitants take pleasure in telling of how these fine trees were acquired. In 1873 John W. Beaumont, a real estate man, "went broke" and could not pay his taxes, which amounted to \$116. He offered the city council in lieu of the cash 10,000 young maple trees, from one to two inches in diameter, all ready to set out. It was that or nothing, so the council took the trees. By public proclamation the Mayor fixed an "arbor day," and everybody who would agree to set them out and care for them received from six to ten trees. At that time the town was almost bare of trees of every kind. Almost in a day Mr. Beaumont's legal tender for taxes was in the hands of the inhabitants, and they so faithfully carried out the mayor's injunction that today there is hardly a street in town which is not beautifully shaded by thick leaved trees, suggesting a town in the tropics.

Brain Growth.

The brain usually stops growing at about fifty, and from sixty to seventy it is more likely to decrease. It has been related by Canon MacColl that Mr. Gladstone's head was constantly outgrowing his hat. As late as the Midlothian campaign, when he was nearly seventy, he was obliged to have his head remeasured for this reason. Canon MacColl's conclusion that this continual growth of brain contributed to Mr. Gladstone's personal youthfulness appears not unwarranted.—Spectator.

Italian Diet.

The low resisting power of the Italian even among the more favored classes, to the assaults of disease has long been ascribed to the profession of the well-high farinaceous and leguminous fare on which he subsists—the call on the heart in the later stages of pneumonia, for example, too often finding inadequate response from the defect of the muscle-forming constituents in the diet of the patient.—Lancet.

Housekeeping.

It is generally assumed by one class of the up-to-date that, to be thoroughly domesticated, a woman must be proportionately stupid. Nothing of the sort! Why, the housekeeping of today involves mental gymnastics before which the tricks of the trade in diabolists pale.—Lady Phyllis in the London Bystander.

King's Palace on City Ground. The Brussels Municipal Council has halted the work on the King's new palace because the building has been found to lap over on city property about twenty-four feet. The architect has only a month to set the building back.

NEWSPAPERS IN COLORS.

Have Been Printed a Scarlet, Mauve and Yellow.

The Chung Ngai Can Po, which recently celebrated its jubilee by appearing on scarlet pages, has had many equally unconventional predecessors.

When the stock of white printing paper in the island of Trinidad once ran out the Port of Spain Gazette made a brilliant appearance on mauve paper, with a bright yellow inside supplement, followed by an issue printed on cerise paper, with a magenta supplement; a Cape newspaper was once published on brown paper the normal use of which was for parcels, and two successive issues of a native journal of Ahmedabad, were a brilliant yellow and a dark green.

Even more remarkable was Le Mouchoir de Poche Politique, a French daily paper, which was printed on linen, and served the double purpose of a news purveyor and a handkerchief.—From the Westminster Gazette.

French Married Life.

The high average of reasonably happy marriages in France, where marriage is mostly a family arrangement, is not so inexplicable as we might think. One thing, we suppose, and that is how the French girl passes from her obscure and untried existence before marriage to the wisdom and self-possession of the young French married woman, who seems to wield the experience of all the ages. The adaptability of French women is beyond praise, as it is beyond explanation.—London Spectator.

Why Europe Chuckles.

The Americans cannot complain in their present financial embarrassment is the cause in Europe of a little secret chuckling, of a good deal of open headshaking and of some rather Pharisaical comparisons of business methods. Modesty never was the strong point of our energetic cousins, and their millionaires and their trusts and their record-breaking and undefeatable prosperity had been thrust down our throats till the gorge rose. Their position is for the moment humiliating.

A Woman's Face.

No words can express the almost divine love and tenderness and the perfect trust and happiness of that girl-wife's face, as she looked into the eyes of her husband—and smiled. Other holiday impressions may grow dim and fade away, but that sweet woman's face remains stamped on my memory forever.—"Wynne" in the Reader.

Italian Government Must Feed 300,000

The Italian government warns its people that 300,000 persons must be fed this winter. Two hundred thousand had intended to come to America when kept out by our panic, and 100,000 will return who cannot get work here on account of the panic.

NOW READY—THE AMERICAN GOVERNMENT.

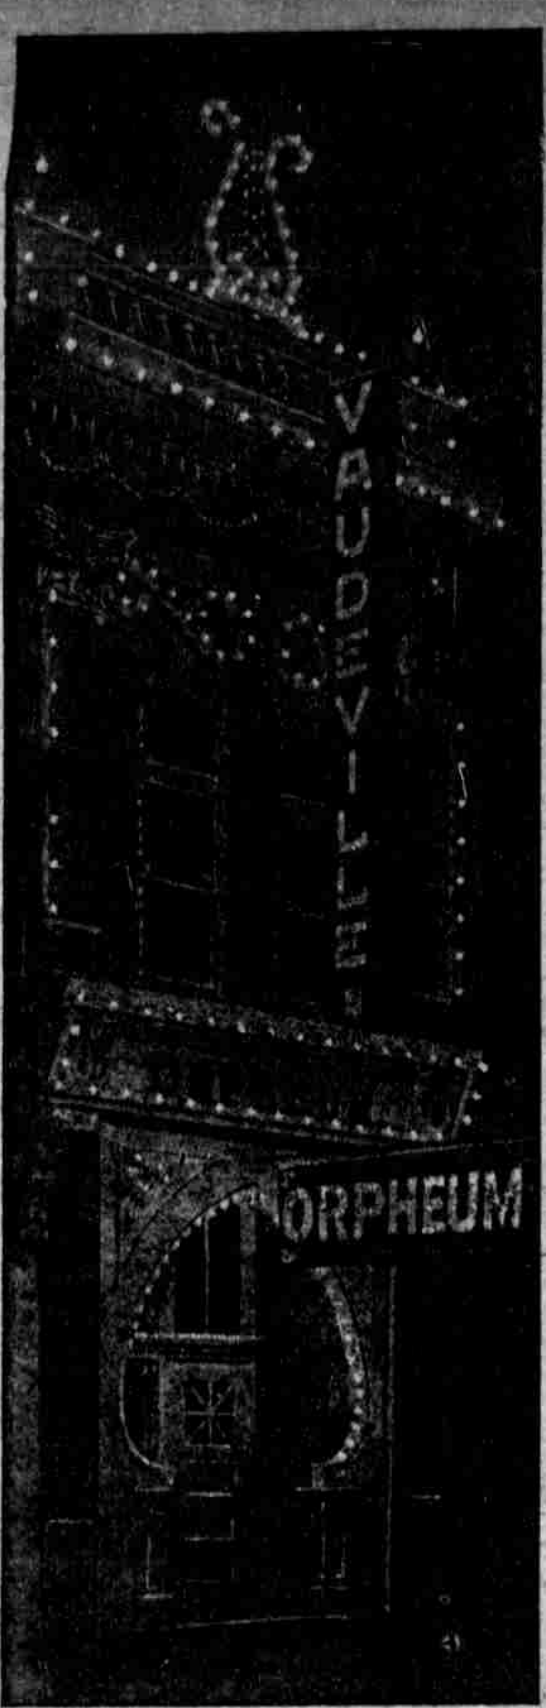

We have just published a work entitled "The American Government," edited by H. C. Gauss, Esq. Mr. Gauss is a trained journalist at present occupying the responsible position of Private Secretary to Attorney General Bonaparte.

This book not only gives a list of all offices of sufficient importance to be filled by Presidential appointment and subject to confirmation by the Senate, but a complete statement of the powers and duties pertaining to each office and the salary attached thereto. How many Americans are there who could tell precisely what the powers and responsibilities of the United States District Attorney or the Collector of the Port are, and the extent of power vested in the hands of Bank Examiners and the Comptroller of the Currency, and to what work of reference could they turn for full information upon these subjects?

This book contains information upon points of law, procedure and custom not known to many of even the best informed citizens. Not many know that the terms of the Postmaster General and the Comptroller of the Currency extend a month beyond the term of the President who appointed them, and that the Postmaster General, unlike other Cabinet officers, can be removed by the President only with the consent of the Senate. Few know that United States Senators and Representatives have a right to select, subject to the passing of examinations, cadets in the Naval Academy, but have no such right with reference to the Military Academy, for which their selections are merely advisory, the President having the sole power of appointment. These and many hundreds of other facts as little familiar are brought out in this useful volume.

What American traveling abroad or contemplating going abroad but would gladly know the duties and powers of the American Ambassador and Minister, the Consul General and the American Consul; what their duties are not only to the Government they represent, but to American citizens who visit the countries to which they are accredited as well. Not long since a famous New Yorker lost a suit in the United States Circuit Court involving more than \$100,000. He desired to appeal it to the Supreme Court of the United States, but was astounded at being told by his lawyers that they were not sure that he could appeal it, and to his astonishment the Supreme Court refused to hear the case. Now this book tells just what cases can be heard in United States courts and the jurisdiction of each court; and also covers all points likely to come up about the Government and its officials in all their relations at home and abroad.

The book makes a volume of nine hundred pages, bound in half morocco, and the price is \$5. It is a book of reference for American citizens and for foreigners who desire full and authentic information as to the organization of the United States Government. L. R. HAMMERSLY & CO., 1 WEST 34TH ST., NEW YORK.

COALS TO NEWCASTLE.

Boston, Which Doesn't Need It, Getting Lots of Brainfood.

If fish is the greatest brain food, as scientists have said, then Boston is in a fair way to outstrip the rest of the country in brain development without half trying. In two days there have been brought to T wharf—the greatest fish mart of the country—more than two million pounds of fish, including large and small cod, haddock, hake, pollock, halibut and various other species of the deep. This enormous catch has been brought by 100 schooners, in round numbers, sixty-five of which arrived yesterday and the remainder today.

Granting that the fleet of 100 schooners averages twenty men to the vessel (which probably is a high estimate) and the average sum coming to each fisherman, outside of the captain, is about \$20, representing from five days to between two and three weeks at sea. Of course, the same vary, according to the vessel, the catch and the time spent at sea. Some schooners brought in as high as 75,000 pounds and some little more than 5,000; some had five men in the crew and some twenty-five; some caught plenty of large cod and some very few.

Rights of Automobiles on Highways.

The town of Ayer, Mass., has appealed to the supreme court of that state a suit won by a motorist who recovered damages for injuries to his car, caused by sinking into a sandy street. The decision will settle finally whether or not an automobile has the same rights to a highway as a horse-drawn vehicle.

Some men eat an awful lot of bread at an ale crute restaurant.

States of Ohio, Insurance Department, Columbus, January 31st, 1919.—J. Charles C. Lemert, Superintendent of Insurance of the State of Ohio, do hereby certify that the

Testaments Insurance Company, located at Allegheny, in the State of Pennsylvania, has complied in all respects with the laws of this State, applicable to it, and is authorized to transact in this State on the capital stock plus its appropriate business of insuring property against loss or damage by fire and lightning and tornadoes, as provided in Section 1441, paragraph first, Revised Statutes of Ohio, during the current year. Its condition and business, on the thirty-first day of December of the year next preceding the date hereof, is shown by the statement, under oath, as required by Section 144, of said Revised Statutes, to be as follows: Aggregate amount of available assets, \$714,133.41; aggregate amount of liabilities (except capital), including re-insurance, \$235,030.31; net assets, \$479,103.10; amount of actual paid-up capital, \$200,000.00; surplus, \$279,103.10; amount of income for the year in cash, \$420,263.61; amount of earnings for the year in cash, \$246,240.95. In witness whereof, I have hereunto subscribed my name and caused my official seal to be affixed, the day and year first above written.

Charles C. Lemert, Supt. of Ins.

FOR SALE.

17 acres 7 miles north of Canton, 15 acres under cultivation, balance pasture. 6 room frame house, good barn, all necessary outbuildings; all in first class shape. First class truck farm. Price \$3000.00.
